

SERVICE: SURVEYING - CONSTRUCTION STAKING - MINOR PROJECT _012

Includes the verification of horizontal alignment or boundary configuration, limits of right-of-way, and the vertical controls from which a minor project is to be constructed. Also includes the establishment of necessary site-specific construction benches and horizontal control points, and the physical placement of all construction stakes necessary to enable the contractor to locate the proposed minor project improvements.

Minor project improvements may be defined as improvements normally associated with the construction of urban arterial roads, collector roads, pedestrian bridges, special improvement districts, and flood control improvements.

Minimum Qualifications

FIRM EXPERIENCE

- Minimum of one, up to five, construction staking urban arterial roads, collector roads, Special Improvement Districts (SID), flood control improvements, and other structures or design features unique to minor projects administered or performed by the firm in the last six years.
- Submit up to five projects which included construction staking of significant infrastructure improvements.
